The **SUPERVAP 10 KW** is a heavy duty industrial 3-phase machine with a 4.5 liter boiler generating sufficient vapor steam at 415v~ for most industrial cleaning and sanitizing applications.

Dry or wet saturated steam of 180°C delivered at up to 10BAR of pressure will make light work of even the most stubborn grease, dirt, biofilm etc..., while being completely environmentally friendly!

With steam it's Liters per hour versus Liters per minute compared to the alternative cleaning technologies in use. We offer quality wet and dry steam on demand instead of sheer quantities of water and chemical.

A Vacuum facility optionally available for quick clean-up of slip and fall surfaces, walls, glass, and most flat surfaces. Ideal for many food plant applications.

Save on water, chemical and most importantly reduce costly waste!

The **SUPERVAP 10 KW** comes complete of:

- 1 Steam only tool kit – complete (see rear page for details)
